THE MOST VERSATILE POWER TROWEL ON THE MARKET.

AIR POWERED

The HoverTrowel is a pneumatically driven unit that requires an air supply between 90 - 100 psi while producing 18 - 36 cfm.

PITCH CONTROL

The HoverTrowel's fingertip pitch control easily changes the blade angle from 0° to 10° while the trowel is in operation.

INTERCHANGEABLE MOTORS

Interchangeable motors supply different torque loads and rpm for various applications.

TELESCOPING HANDLE

The telescoping handle easily adjusts from 42" to 64" at 6" increments allowing access to confined spaces and reaching further onto the fresh mortar.

WEIGHT SET

22 lb. weight set conveniently adjusts the weight of the trowel from 35lbs. to roughly 55 lbs. at 2.5 lb increments.

BLADES

With the HoverTrowel's blade selection you can power trowel systems normally hand troweled. The HoverTrowel has various blade types ranging from standard tool steel, stainless steel, a line of floats like mahogany, laminated resin, magnesium, and other specialty blades.

INTERCHANGEABLE GUARD

The blades and ring guard can be changed easily modifying the troweling diameter from 25" to 34".

HOVERTROWEL SPECIFICATIONS

PATENT NUMBER	5,205,669
