

# ONE STEP™

SMART. TOUGH. SEAMLESS. ONE-STEP EPOXY FLOORING.

THE GLOBAL INNOVATOR IN EPOXY FLOORING

## THE ONE-STEP DIFFERENCE

Most epoxy floors are installed with a broadcast system involving multiple steps and long wait times. The One-Step Epoxy Flooring System is resin-rich with 3 pounds of rock per pound of resin, mixed together and installed in one step for faster installation and cure time. The result is the highest quality epoxy floor available, designed to last years with minimal maintenance.

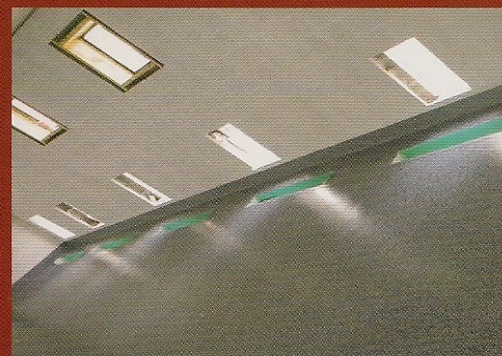

A durable One-Step Epoxy Floor is completely customizable with a full range of color options as well as pattern and border choices. We ensure color match for repair or replacement with archived color formulas.

## ASBESTOS REMEDIATION

One-Step is tested and approved for asbestos remediation. Our cost effective solution encapsulates asbestos tile and eliminates the need for removal.

## SMART ENOUGH FOR THE MILITARY. TOUGH ENOUGH FOR YOUR FACILITY.

One-Step's American-made epoxy floors have been serving the US Army, Navy and Coast Guard fleets for 35 years and meet tough military specifications. One-Step Epoxy Floors are QPL listed by the military (MIL-PRF 24613 Type III). It's the only epoxy floor system backed by certified installers, an exclusive dealer network and a 10 Year warranty.

## ENVIRONMENTALLY SAFE

### ONE-STEP'S GREEN ADVANTAGES

Non-toxic One-Step Epoxy Flooring goes down without harsh chemicals and zero VOCs (Volatile Organic Compounds) so there are no harmful odors or need for special ventilation or respirators during installation and cure time.

One-Step Epoxy Flooring encapsulates ceramic tile, quarry tile, vinyl tile, linoleum, sheet vinyl and asbestos tile. One-Step's installation process also eliminates the need for removal and remediation, reducing landfill waste.

### ONE-STEP EPOXY FLOORING SMART. TOUGH. SEAMLESS.

- A smart investment with low total cost of ownership
- Long life expectancy with proper maintenance
- Low maintenance and easy to clean
- Quick installation (2 to 3 days turnaround; 24 hour turnaround in some cases)
- Eliminates grout problems with a seamless flooring solution
- Lightweight (Only 1.2 lbs per square foot installed)
- Slip resistant finish
- Chemical resistant
- Non-porous - No re-sealing, waxing or striping required
- Fire resistant for enhanced safety
- Packaged in quality controlled, pre-weighed and pre-measured 5 gallon containers providing 25 to 30 sq. ft. of floor coverage
- Supported by our comprehensive maintenance program
